Case No. 3:22-cv-03131-JCS

**DECLARATION OF JENNIFER  
PENROSE ON BEHALF OF THE  
NATIONAL CENTER FOR MISSING &  
EXPLOITED CHILDREN**

DECL.OF JENNIFER PENROSE

1 I, Jennifer Penrose, hereby declare:

2 1. I am the Data Science Manager at the National Center for Missing & Exploited Children  
3 (NCMEC). I have personal knowledge of the facts set forth herein, and, if called upon to testify, could  
4 and would testify competently thereto.

5 2. I have been employed at NCMEC since March 2021. In my role at NCMEC, I manage  
6 the Data Science team, which serves as subject matter experts in data schemas housed at NCMEC and is  
7 responsible for supporting data requests related to the data that NCMEC maintains for its programs of  
8 work as the national clearinghouse for missing and exploited children. The Data Science team regularly  
9 queries and aggregates data for the Exploited Children Division, Missing Children Division, and  
10 Analytical Services Division to respond to internal and external data requests as they pertain to business  
11 operations.

12 3. It is routine for the Data Science team to query and aggregate data for internal operation  
13 purposes or in response to external requests from stakeholders. When a request is received, the Data  
14 Science team gathers and validates the requirements of the request, converts the requirements into  
15 technical functionalities, and then internally validates the results before passing completed information  
16 along to the requesting party.

17 4. On August 28, 2023, Bettye Allwang of the Exploited Children Division, on behalf of  
18 John Shehan, asked that I compile information showing the number of CyberTipline reports in which an  
19 ESP submitted data concerning the suspect or recipient and also concerning the specific image or video  
20 containing suspected CSAM content.

21 5. Upon receiving the subject request, I, along with the Data Science team, filtered through  
22 the requisite CyberTipline reports based on the timeframe provided by the Exploited Children Division,  
23 2019-2022. I then worked with our Data Science team to complete a set of SQL Joins, commonly known  
24 as "Structured Query Language Joins", which is a framework for querying data that allows you to match  
25 data from one table to data from another table based upon a value in one table having an equivalent  
26 value in another table.

27 6. Data Science performed the SQL Joins in order to associate which data is contained  
28

within each CyberTipline report. Through such processes, the Data Science Team was able to filter CyberTipline reports in the relevant timeframe by Name; Home/Business Address; Mobile/Business Phone Number; Email Address/Screen or User Name/Display Name, and Profile URL. Based on these results, the Data Science Team was then able to count unique CyberTipline reports appearing within those specific parameters.

7. After counting the unique CyberTipline reports appearing within the specific parameters, Data Science reviewed the logic internally as a team. Afterwards, the Data Science team reviewed the logic with Bettye Allwang of the Exploited Children Division. After receiving feedback from the Exploited Children Division, Data Science performed a final check of the data and conducted an internal sample to make sure the requested information was accurately reflected in the final output.

8. This completed data set was provided to Bettye Allwang with the Exploited Children Division on September 19, 2023. This information is reflected in Paragraph 21 of the Declaration of John Shehan.

I declare under the laws of the United States that the statements in this declaration are true and correct to the best of my knowledge, and that this declaration was executed on September 22, 2023 in Alexandria, Virginia.

**Jennifer Penrose**
